

## Benefits of Infusions, Implants and Add-on's

**Implants:** Are retained and absorb directly into the colon lining allowing the potent nutrients to be absorbed or to colonize in the case of the probiotic implants.

**Infusions:** Are retained and then released. A liquid solution is delivered into the colon either "in-line" during the colonic or directly after the session administered as an enema.

- Cleared of fecal matter the health benefits of the infusions or implants are able to fully penetrate the colon lining with it's rich capillary network and be absorbed into the bloodstream, a powerful way to boost detoxification and increase nutrient levels!

**Coffee Infusion:** High in antioxidants and antimicrobial, coffee deters the growth of unfriendly bacteria in colonized bio-films. It stimulates production of glutathione a master detoxifier. A good choice for any condition involving low immunity, such as cancer, mast cell disorders, and many other conditions. It stimulates the liver to release bile toxins filtered out of the blood.

**Bentonite Clay Infusion:** As a stand alone infusion or an add-on to a coffee infusion, clay's powerful drawing action absorbs toxins such as heavy metals directly from the blood. Excellent for ulcerated or inflamed bowels it soothes the colon and continues its healing actions as it settles into the lining of the colon. High mineral content is absorbed into the bloodstream.

**Live Wheatgrass Infusions:** Two ounces of live wheat grass diluted with 16 oz. of slightly warm water infuses this chlorophyll nutrient rich super food into the colon to break down biofilms and support healthy colon probiotics.

**Humic/Fulvic Acid Add On:** Antimicrobial against parasitic infections, fights pathogens and boosts antioxidants, which are very important in preventing oxidative stress and maintaining a healthy immune system. Studies have found fulvic acid to be useful topically against fungal and bacterial pathogens like staph strains resistant to other drugs. Add-on to coffee or bentonite clay infusions for a high nutritional boost!.

**Colloidal Silver Infusion:** Used for centuries silver is a natural antiseptic and antiviral. Using 10 part per million solution in an infusions sends the colloidal silver into the lining of the colon and directly to the blood stream for a boost in immunity. Powerful anti candida yeast agent as well.

**Probiotics Implant:** Billions of live probiotics cultured specifically for the colon are retained to colonize the colon boosting immunity and the colon's ability to maintain proper bacterial balance.

**Live Wheatgrass Implant:** Powerfully cleansing, high in nutrients and chlorophyll. Through the implant you can receive 4x's the dosage one could take orally. Made famous by Ann Wigmore, wheatgrass boosts vitality and improves health. Humic/fulvic acid can be used as an add-on for this implant.

If you have questions or seek more information about which implant or infusion is best for you feel free to connect with Bridge to Health @ 805-235-8071 or email
